9 2/3 fl oz Cone Top Beer Can Overview

After finding some info about new 9 2/3 oz cone tops I did some research and made a new overview of all cans. My starting point was an article written by Sean Kelley in the BCCA News report Feb/March 2005. I used the same layout, just added new information.

In Sean's article 24 cones were listed. Now, 8 years later, 36 cans are known.

There might be another cone top called "Mayflower Brand Export Pils", but nobody does have any details or photos about this can.

Thanks to Nick West, Sean Kelley, Roger Johansson and Joel Smith for info and photos of these beer cans.
